

Scenario 1

Jeremias

Jeremias sees a product he likes, in this case, an ice cream

He goes inside the store and buys it with cash.

After buying it, he easily input the value of the transaction in his budget app.

Scenario 2

Bianca

Bianca wants to retire early, but her salary is low.

So Bianca wants to start investing what remains of her salary every month.

Fortunnnately her budgetting app provides helpful tips and advices regarding investments.

Scenario 3

Bruno

Bruno sees a pair of headphones he wants to buy.

Fortunately, since he has an organized budget with all the transactions he has made, he quickly knows if he can buy the headphones.

He finds out that this purchase would exceed his budget so he does not buy the headphones.

When he arrives home and reviews his budget he realizes that his budget is still on track and he is one step closer to moving out of his parent's home.
